Upon consideration of the applicants appeal brief sent August 6, 2001 and upon further review of the application, it has been determined that the case is subject to a restriction requirement. Therefore, the prosecution of the application has been reopened so that the restriction requirement can be properly addressed.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25 and 39-90, drawn to the combination of sash removable from a sash frame via counter balance shoes, classified in class 049, subclass 446.
- II. Claims 29-38, drawn to counter balance shoes, classified in class 016, subclass 193.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination requires at least the elevational configuration extending integrally downwardly from an upper region of the shoe. The subcombination has separate utility such as use in a sash and frame system wherein the sash is not removable.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Eugene S. Stephens on July 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
